

16 December 2022

Dear Supporter,

forevernaturefund
protect today. tomorrow. forever.

**On 14 December we launched the most important fund in
Nature Foundation's 41 year history.**

Although we already own and manage over 500 000 hectares of critical refuges for Australian flora and fauna, we want to double our impact to 1 million hectares by 2030!

To achieve this, our target for this new fund is \$20m by 2030! That's a lot of money! But habitat loss and land clearing have already caused the extinction of 62 Australian terrestrial species. And nature and its life-support system are critical for human survival providing food, water, climate regulation and well-being for all society.

To realise a nature-positive future where biodiversity is secure, and our life-support system is thriving forever, these funds will enable Nature Foundation to purchase land with high biodiversity value to create more critical refuges for Australian wildlife and stop habitat loss.

The forevernaturefund aims to raise capital to:

- purchase areas of critical habitat
- that are prioritised using data driven scientific and environmental assessment tools
- and manage these areas for conservation guided by Nature Foundation's more than 40 years' experience.

The funds in the new forevernaturefund will be professionally managed by an external fund manager in accordance with Nature Foundation's Financial Management and Investment policy ensuring all donations will be responsibly managed.

Be part of the change and donate to the forevernaturefund now, so that together we can realise a nature-positive future!

Thank you for your ongoing support of Nature Foundation.

Yours sincerely,

**Jan Ferguson OAM
CHAIR**

and

**Dr Barbara Hardy AO
PATRON**

**Nature
Foundation**
